## The Arabic Alphabet Posters

The Arabic alphabet contains 28 letters. Some count 29 letters as they will differentiate the hamza ء and the alif ا as 2 letters.

### 4 positions letters

Each letter of the alphabet can have up to 4 different forms depending on its connection to the letter before and after.

Letters who have only 2 forms, or semi-connected letters, do not connect with the letter placed after them.

### Moon & Sun letters

All the letters are divided into two groups which characterize differences in pronunciation after a definite article.
